

HASAN MAHMUD MAZUMDER

BSc in Computer Science – BRACU

Cell: +88 01947403428

Email: hasanmahmudmajumder@gmail.com

LinkedIn: hasan-mahmud-mazumder

Address: Khilkhet, Dhaka

Computer Science graduate with hands-on experience in software engineering, full-stack development, software testing, QA, business analytics, and R&D. Skilled in Java, Python, JavaScript, SQL, React, Node.js, Flutter, and MongoDB, with experience in web/mobile applications, REST APIs, real-time systems, and database management. Strong in testing, defect identification, performance analysis, research, and problem-solving.

CORE COMPETENCIES

- Software Engineering
- Software Testing & QA
- Research & Development
- Full-Stack Development
- Web Application Development
- Mobile App Development
- Functional Testing
- Performance Testing
- Test Analysis
- Requirements Gathering
- System Analysis
- Database Management

EDUCATION

BSc in Computer Science – 2026 | BRAC University | CGPA: 3.00/4

HSC in Science – 2020 | Comilla Victoria Govt. College | GPA: 5.00/5

SSC in Science – 2018 | Comilla Zilla School | GPA: 5.00/5

PROJECTS & RESEARCH

Meal Management System

- Engineered a full-stack meal and expense system for automated meal, grocery, member, and cost tracking.
- Added smart purchase-entry parsing, PDF/CSV reporting, responsive interfaces, and RESTful backend services.

SoundScape – Modern Music Streaming Platform | BRAC University

- Developed a full-stack music platform with discovery, playlists, favorites, history, social features, and real-time chat.
- Built artist dashboards, analytics, user management, content moderation, and admin controls.

Amar Elaka – Real-Time Community Incident Tracking & Safety Platform | BRAC University

- Built a real-time incident platform with reporting, alerts, voting, comments, status updates, and maps.
- Implemented JWT, RBAC, severity tracking, rate limiting, and PDF reporting.

Adda Time – Secure Social Messaging App | BRAC University

- Built a Flutter messaging app with chat, media sharing, reactions, authentication, and real-time communication.
- Implemented AES-GCM, X25519, secure storage, privacy controls, and voice/video calling.

Highway Rush – 2D Game | BRAC University

- Developed a 2D highway racing game featuring vehicle control, navigation, obstacles, and arcade gameplay.
- Applied C++, OpenGL, and computer graphics to implement controls, scenes, and interactive game mechanics.

Log Anomaly Detection: Deep Learning vs Classical ML – 2026 | BRAC University

- Evaluated deep learning and classical ML methods for system-log anomaly detection in a SIEM-style framework.
- Applied ML techniques to security-log analysis, anomaly identification, and model comparison.

CERTIFICATION

Craft Effective Prompts for Microsoft 365 Copilot – 2025 | Microsoft Learn – Prompt Engineering, Microsoft 365 Copilot

EXTRACURRICULAR ACTIVITIES

- Participant – WYABC Dignity Academy 2025 – 2025** | World Youth Alliance Bangladesh Chapter
- Volunteer – 2025** | PUBG Mobile Campus Club Bangladesh – Supported campus-level club activities and operations.
- Volunteer – 2024** | BRAC University – Harry Potter Fest – Supported event activities and campus program execution.

TOOLS & TECH

Git • GitHub • VS Code • Android Studio • Xcode • Postman • Figma • Jira • MongoDB • MySQL • Firebase • Cloud Firestore • Cloudinary • Socket.IO • Clerk • ZegoCloud • Stream Chat SDK • Microsoft 365 Copilot
